# WORCESTER METAL CORNER BEAD

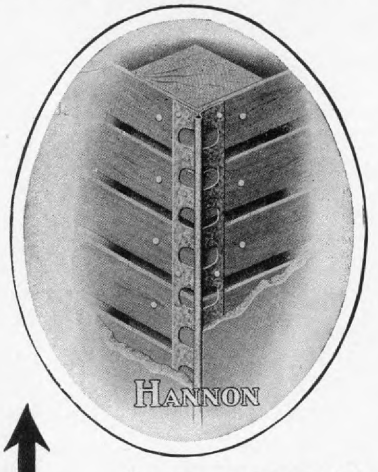
(PATENTED)

## A Reliable Protector for Plaster Corners on Wood, Brick, Terra Cotta, Iron,

Etc.

Made in lengths of six to eight feet

Can be arched to fit any desired radius



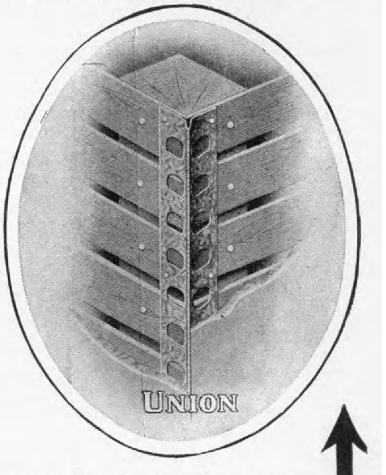
MANUFACTURED BY

## JOHN L. PARKER CO.

62 Jackson Street

WORCESTER, - MASS.

---



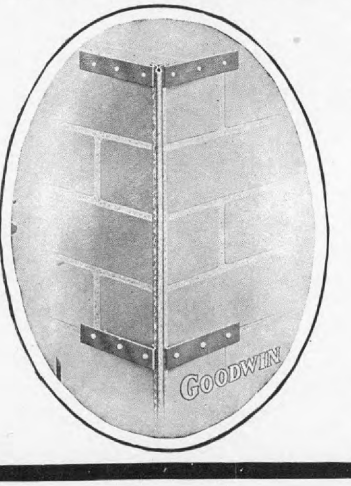
## ALWAYS AT THE TOP

HANNON METAL CORNER BEAD is the strongest, most rigid corner protection you can get. Makes a slightly rounded corner—the delight of our Western Architects. HOT GALVANIZED TWICE—cannot rust. We originated the no-rust bead. Others imitate our galvanizing—but they fail to secure the desired results. They lack the "know how."

UNION METAL CORNER BEAD—famous narrow edge bead. Fits the corner as snugly as milady's glove—no weakening space between wall and bead. The bead that looks as bright and fresh as a newly-coined "cartwheel" from the mint—that's our DOUBLE (hot-process) GALVANIZING. The bead that has the PERFECT plaster-key—that grips the plaster in a strangle-hold.

GOODWIN METAL CORNER BEAD—AT LAST, a clip-bead that satisfies! The clips are adjusted to the Goodwin before shipping—prevents delays. Saves workmen's time. Clips are movable, and being pivoted where the clip grips the bead, they CANNOT BREAK, as other clips do. HOT GALVANIZED TWICE. The GOODWIN makes a corner like our HANNON, slightly rounded.

### "OUTERSITE" METAL PICTURE MOULDING



an INVISIBLE moulding, has caught the architects' eye.

So also has

### HANNON METAL PICTURE MOULDING,

an ORNAMENTAL moulding.

*Everything we make appeals to the KNOWING man.*

*Have you samples? If not, you should have.*

*In CORNER BEADS we can supply all your wants.*

# CAMERON PUMPS

## REDUCE PUMPING COSTS

As they are the simplest, with the fewest working parts, and require the least attention and care, it costs next to nothing to keep Cameron Pumps in perfect working condition. Designed and built in the light of over half a century of experience, they give many years of excellent service in situations that would quickly wreck the "ordinary" pump.

*Catalog No. 50, sent on request, contains valuable information for Engineers and Pumpmen.*

# SIMMONS REEL

Upon this reel is suspended the Line Fire Hose and to which at one end is attached a nozzle and to the other an angle valve connecting with water line. A turn of the valve wheel—a slight pull on the nozzle and, presto, you have your own Fire Department right on the spot and that is when you need it, right at the incipiency of a blaze.

**This reel, which can be finished in any tone to harmonize with interior decoration, is constructed of a finished metal.**
